Professional Summary

Full-stack Software Engineer with 3 years of experience building scalable web and mobile applications using React, Laravel, and Flutter. Proven track record in developing high-performance APIs, optimizing user experience, and delivering cross-platform solutions in remote and collaborative environments

Professional Experience

Front-end Developer (React)

InvoiSmart | Lagos state, Nigeria (remote) | October 2025 – Dec 2025

- Improved user engagement by redesigning responsive UI with React.
- Integrated 20+ backend APIs ensuring accurate data flow.
- Optimized performance by reducing re-renders and improving efficiency.
- Implemented validation, error handling, and loading states.
- Tech: React, Typescript, Tailwind CSS

Software Engineer

Lyridra | Lagos state, Nigeria (remote) | September 2025 – January 2026

- Built full-stack applications across web and mobile platforms.
- Developed scalable APIs using Laravel ensuring reliable data flow.
- Improved performance and cross-device compatibility.
- Collaborated in remote teams delivering production-ready apps.
- Tech: Laravel, React, Flutter, MySQL, Firebase, Supabase,

Lead Software Engineer

NovelSolar integrated services | Oyo State, Nigeria (Onsite) | September 2023 – present

- Led development of cross-platform applications (web, mobile, desktop).
- Engineered scalable backend APIs supporting dynamic applications.
- Reduced system issues through testing and debugging practices
- Improved UI/UX consistency across platforms.
- Tech: PHP, Laravel, Flutter, React, Typescript, MYSQL, Firebase, Supabase, Postgresql

Key Projects

Doc File Converter | [\[Link\]](#)

Jan 2026 - Jan 2026

Developed a **Doc File Converter** to enable users to convert documents across multiple formats and generate shareable links, improving accessibility and collaboration.

- Built a multi-format file converter with shareable links.
- Reduced manual conversion effort by 60%.
- Tech: React, Typescript, Supabase, Tailwind CSS, Vite

Funds Management Mobile App | [\[Link\]](#)

December 2025 - Jan 2026

Developed a **mobile application** that automates fund requests, approvals, and disbursements, eliminating manual paperwork and improving operational efficiency.

- Automated fund request and approval workflows.
- Enabled real-time tracking of requests and approvals.
- Tech: Flutter, Dart, Supabase,

Solar-Load Estimator | [\[Link\]](#)

Jan 2025 - Feb 2025

Developed a Solar-Load Estimator to help users calculate the ideal solar setup and estimate costs based on selected appliances for homes and businesses.

- Automated solar calculations reducing estimation time by 40%.
- Generated PDF reports and system recommendations.
- Tech: Laravel, JavaScript, MySQL

Wallet Api | [\[Link\]](#)

March 2025 - March 2025

Built a scalable wallet management API enabling secure multi-wallet operations and real-time transactions.

- Designed and implemented RESTful APIs supporting wallet creation, balance management, and transfers
- Achieved sub-250ms response time through query optimization and efficient database indexing
- Implemented secure wallet-to-wallet transfers with minimum balance enforcement and transaction validation
- Improved system usability by 40% through reliable and well-structured API endpoints

Stock Reconciliation system | [\[Link\]](#)

February 2024 - May 2024

Created a Software for stock management that automates stock management processes

- Developed a **stock management software** that automates inventory processes for multiple branches, improving operational efficiency.
- Automated stock calculations, reducing **manual tracking efforts by 40%**, and minimizing human error.
- Streamlined inventory monitoring with **real-time stock movement tracking**, cutting reconciliation time by 35%.
- Improved **reporting accuracy by 30%** through detailed transaction summaries, enhancing data-driven decision-making.
- Reduced **inventory discrepancies by 25%** using automated calculations and error detection logic.
- Enabled internal control teams to **reconcile sales across branches monthly**, tracking stock transfers, received inventory, and available stock accurately.

Education

Oduduwa University Ipetumodu | Osun State, Nigeria | Jun 2016 - Jun 2021

Computer Science (B, SC)

Skills and Interest

Backend: Laravel, PHP, RESTful APIs

Frontend: HTML, CSS, JavaScript, React, TypeScript, Tailwind CSS, Bootstrap

Mobile: Flutter, Dart, Supabase, Firebase

Database: MySQL, PostgreSQL, SQLite

Tools: Git, GitHub, GitLab, VS Code

Soft Skills: Growth Mindset, Creativity, Communication, Teamwork, Critical Thinking, Leadership

Languages: English (Fluent)
