Professional Summary

Full-Stack Software Engineer with 3+ years of experience building mobile, web, and desktop applications using Flutter, Laravel, React, TypeScript, and PHP. Experienced in developing scalable REST APIs, integrating third-party services, and delivering cross-platform solutions in remote and collaborative environments. Passionate about building high-quality products that improve operational efficiency and user experience.

Professional Experience

Lead Software Engineer

NovelSolar integrated services | Oyo State, Nigeria (Onsite) | June 2023 – May 2026

- Led the development of mobile, web, and desktop applications using Flutter, Laravel, and React.
- Architected and maintained scalable backend APIs supporting multiple business workflows and third-party integrations.
- Collaborated with stakeholders to gather requirements and translate business needs into scalable software solutions.
- Tech: PHP, Laravel, Flutter, React, Typescript, MYSQL, Firebase, Supabase, PostgreSQL

Software Engineer

Lyridra | Lagos state, Nigeria (remote) |

February 2025 – June 2026

- Developed and maintained full-stack applications across web and mobile platforms using Flutter, Laravel
- Designed and implemented scalable REST APIs supporting business-critical workflows and third-party integrations.
- Improved application performance and cross-device compatibility through optimization and responsive design Practices
- Tech: Laravel, React, Flutter, MySQL, Firebase, Supabase,

Front-end Developer (React)

InvoiSmart | Lagos state, Nigeria (remote) |

October 2025 – February 2026

- Redesigned responsive user interfaces using React and TypeScript, improving usability across desktop and mobile devices.
- Integrated 20+ REST APIs, ensuring seamless data exchange between frontend and backend systems.
- Implemented robust form validation, error handling, and loading states, improving user Experience and application reliability.
- Tech: React, Typescript, Tailwind CSS

Key Projects

Medeet | [\[Link\]](#)

June 2026

Developed mobile application of a comprehensive healthcare platform connecting patients with healthcare professionals for appointments and consultations, Published on the [Google Play Store](#)

- Synchronized complex data from HTTP APIs and Web Sockets with a local SQLite database, Ensuring robust offline persistence.
- Implemented dynamic system theming (light/dark mode) and optimized state management Using Provider (ChangeNotifier) to improve UI responsiveness.
- Integrated Google Maps API for location-based specialist searches and engineered a declarative routing system to streamline complex onboarding flows.

Solar-Load Estimator | [\[Link\]](#)

Jan 2025 - Feb 2025

Developed a Solar-Load Estimator to help users calculate the ideal solar setup and estimate costs based on selected appliances for homes and businesses.

- Automated solar calculations reducing estimation time by 40%.
- Generated PDF reports and system recommendations.
- Tech: Laravel, JavaScript, Html, Css, MySQL

Doc File Converter | [\[Link\]](#)

Jan 2026 - Jan 2026

Developed a **Doc File Converter** to enable users to convert documents across multiple formats and generate shareable links, improving accessibility and collaboration.

- Built a multi-format file converter with shareable links.
- Reduced manual conversion effort by 60%.
- Tech: React, Typescript, Supabase, Tailwind CSS, Vite

Wallet API | [\[Link\]](#)

March 2025 - March 2025

- Built a scalable wallet management API enabling secure multi-wallet operations and real-time transactions.
- Achieved sub-250ms response time through query optimization and efficient database indexing
- Implemented secure wallet-to-wallet transfers with minimum balance enforcement And transaction validation.
- Improved system usability by 40% through reliable and well-structured API endpoints
- Tech: PHP, Laravel, Npm

Jimi VoiceCalc – AI-Powered Voice Calculator | [\[Link\]](#)

June 2026

Developed an AI-powered voice calculator that enables users to solve mathematical expressions through natural speech and receive results via voice feedback.

- Built real-time voice-to-text and natural language parsing for spoken math calculations.
- Implemented voice-based result playback with a hands-free user experience for multitasking.
- Added manual calculator fallback, calculation history, and local persistence to improve usability and reliability.
- Tech: Flutter, Riverpod, Hive,

Education

Oduduwa University Ipetumodu | Osun State, Nigeria | Jun 2016 - Jun 2021
Bachelor of Science (B.Sc.) in Computer Science

Technical Skills

Mobile Development: Flutter, Dart, Firebase, Supabase
Backend Development: Laravel, PHP, REST APIs
Frontend Development: React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
Databases: PostgreSQL, MySQL, SQLite
Tools: Git, GitHub, GitLab, Vite, VS Code, Docker, CI/CD
